

**Rules of Statistics – Certificates of Origin**

**Background**

1. At its 121<sup>st</sup> Session in coffee year 2017/18, the Council reviewed proposals for revisions to the Rules on Statistics – Certificates of Origin under the ICA 2007 (document ICC-102-9).
2. This document contains the revised Rules on Statistics – Certificates of Origin under the International Coffee Agreement 2007 which were approved by the Council at its 121<sup>st</sup> Session in March 2018.

## RULES ON STATISTICS

### CERTIFICATES OF ORIGIN

#### INTRODUCTION

1. For the purposes of the International Coffee Agreement 2007 all Certifying Agencies approved by the Executive Director must be prepared to comply with the following objectives:
  - (a) to ensure that every export of coffee is covered by an ICO Certificate of Origin, or equivalent document<sup>1</sup>, which should be duly stamped and signed by the Customs Authorities or by the Certifying Agency of the exporting Member when they are satisfied that the export is about to take place;
  - (b) to make use of computer systems in order to build up a databank that allows data records to be extracted and recorded in files to be sent to the Organization by email in a specified file format, if the technology is available;
  - (c) to be responsible for adapting their software in order to print Certificates of Origin directly from their databanks in accordance with the format specified by these Rules with a view to reducing costs and to expediting data interchange with the Organization. Alternative arrangements can be agreed depending on the number of Certificates issued by the Member during the coffee year;
  - (d) to keep records of the Certificates they issue, and the basis for their issue, for a period of not less than four years. Computer records shall also be maintained for the same period. Certifying Agencies must undertake to make such records available for examination by the Organization should the need arise;
  - (e) to transmit to the Organization, by email or fax, within **15 days** after the close of the month, a complete list of all shipments that took place in the previous month. This list shall give details of the Certificate serial number; country of destination; net weight of the shipment; form and type of the coffee exported; and any other information deemed relevant. This list shall constitute the basis for the preparation of the monthly report that must be sent by the Member at a later date. Discrepancies between the data reported in the list and in the monthly report may require further investigation of shipments, for which documents may be requested (see sub-paragraph (f) below); and

<sup>1</sup> See paragraph 4 of Article 33 of the 2007 Agreement.

- (f) to forward to the Organization copies of the documentation<sup>2</sup> issued within **60 days** after shipment takes place. Alternatively, for files transmitted electronically, the relevant documentation, if requested, shall be forwarded to the Organization so that the data contained therein may be audited by the Organization.

2. The following Annexes are included:

<b>Annex I</b>	List of exporting Members in alphabetical order showing their respective ICO EU and ISO codes; crop year; type of coffee produced and method of processing mostly used
<b>Annex II</b>	ICO Certificate of Origin <sup>3</sup>
<b>Annex II-A</b>	General guidance for completion of ICO Certificates of Origin
<b>Annex III</b>	List of destinations in alphabetical order showing ICO, EU and ISO codes
<b>Annex IV</b>	Other relevant information
<b>Annex V</b>	ICC Resolution 420
<b>Annex VI</b>	Special characteristics
<b>Annex VII</b>	Specimen spreadsheet for data entry: Certificates of Origin

<sup>2</sup> Copies of Certificates of Origin duly stamped and signed by the Customs Authorities or Certifying Agency together with a copy of the relevant transport document(s).

<sup>3</sup> Artwork/electronic file available if required.

---

RULE 1  
**Definitions**

For the purposes of these Rules:

*Valid Certificate of Origin for exports to all destinations* means a Certificate of Origin issued in accordance with these Rules by a Certifying Agency of the exporting Member country from which the coffee described therein has been exported, provided that:

- (a) the Certificate is marked "ORIGINAL" and bears the cachet of the Customs Service or Certifying Agency of the producing Member country from which the coffee described in the Certificate has been exported; and
- (b) the Certificate shall be valid to cover only the coffee described therein at the time it was issued.

*Export of coffee* means any coffee that leaves the Customs territory of the country in which the coffee is grown and/or processed.

*Customs Service* means the Customs authority of an exporting Member country or the authority designated by the Member for that purpose and accepted by the Executive Director.

*Cachet of the Customs Service* means a Customs stamp, preferably embossed or impressed, that is accompanied by the signature (physical or electronic) of the Officer responsible for its use together with the date of its use.

*Date of export* means the date when the Customs authority in the exporting Member country has duly certified and validated the Certificate of Origin, by stamping and signing it.

*Certifying Agency* means an agency approved under the provisions of paragraphs (2) and (3) of Article 33 of the International Coffee Agreement 2007 to administer and perform the functions specified in paragraphs (1) and (2) of that Article.

*Cachet of the Certifying Agency* means a stamp, preferably embossed or impressed, which is accompanied by the signature (physical or electronic) of the Officer responsible for its use together with the date of its use.

*File format* means the data file format specified by the Organization for data files that are to be transferred by email to the Organization with a view to expediting data interchange and reducing costs.

*Transport document* means a receipt and evidence of a contract of carriage of the coffee, such as a bill of lading, sea waybill, air waybill, railway consignment note, road consignment note, multi-modal transport document or equivalent. When the seller and the buyer of the coffee agree to communicate electronically, the document under reference may be replaced by an equivalent electronic data interchange (EDI) message.

*Types of coffee* means the two most important species of coffee in economic terms: Arabica coffee (*Coffea arabica*) and Robusta coffee (*Coffea canephora*). Two other species that are grown on a much smaller scale are *Liberica* coffee (*Coffea liberica*) and *Excelsa* coffee (*Coffea dewevrei*). For statistical purposes, the two types considered will be Arabica and Robusta, as the demand for the others is not commercially significant.

*Forms of coffee* means the following:

- (a) *green coffee* means all coffee in the naked bean form before roasting;
- (b) *dried coffee cherry* means the dried fruit of the coffee tree; to find the equivalent of dried coffee cherry to green coffee, multiply the net weight of the dried coffee cherry by 0.50;
- (c) *parchment coffee* means the green coffee bean contained in the parchment skin; to find the equivalent of parchment coffee to green coffee, multiply the net weight of the parchment coffee by 0.80;
- (d) *roasted coffee* means green coffee roasted to any degree and includes ground coffee; to find the equivalent of roasted coffee to green coffee, multiply the net weight of the roasted coffee by 1.19;
- (e) *liquid coffee* means the water-soluble solids derived from roasted coffee and put into liquid form; to find the equivalent of liquid coffee to green coffee, multiply the net weight of the dried coffee solids contained in the liquid coffee by 2.6;
- (f) *soluble coffee* means the dried water-soluble solids derived from roasted coffee; to find the equivalent of soluble coffee to green coffee, multiply the net weight of the soluble coffee by 2.6; and
- (g) *decaffeinated coffee* means green, roasted or soluble coffee from which caffeine has been extracted; to find the equivalent of decaffeinated coffee to green coffee, multiply the net weight of the decaffeinated coffee in green, roasted or soluble/liquid form by 1.05, 1.25 or 2.73 respectively.

## RULE 2

**Specifications for Certificates of Origin****Certificates of Origin**

1. Certificates of Origin for exports to all destinations shall be printed, completed and issued in accordance with these Rules. General guidance on the completion of such Certificates is given in Annex II-A to these Rules.

**Specifications for printing Certificates**

2. Certificates shall be of ISO size A4 (210mm x 297mm: 8 1/3in x 11 2/3in).

3. Certificates shall be issued in an original and at least one copy. Certifying Agencies may issue as many additional copies for internal use as may be found convenient or necessary.

4. For the originals of Certificates white paper of chemical pulp shall be used. Each original shall be clearly marked "**ORIGINAL**".

5. One copy of each Certificate of Origin shall be clearly marked "**COPY – for use by ICO**". This copy may be requested to be forwarded to the Organization for auditing if the information contained therein is transmitted by electronic means.

6. Each additional copy, if any, shall be clearly marked "**COPY – for internal use only**" and may contain such additional instructions as considered desirable by the Agency issuing the Certificate.

7. Except as otherwise agreed between a Member and the Executive Director, each Member shall be responsible for printing the Certificates it uses and for entering and transmitting data to the Organization.

8. Box 17 of the Certificates is allocated for other relevant information related to the coffee being exported, i.e., information related to the quality parameters in accordance with Resolution 420; information on special characteristics; the Harmonized System (HS) codes; and the value of the shipment. **The completion of any of the fields in this box is voluntary.**

9. Certificates may be printed in two languages, one of which, except as otherwise agreed between a Member and the Executive Director, must be English.

10. Data files are to be transmitted electronically to the Organization within **15 days** after the close of the month. Arrangements to transmit Certificates data by fax can be made with a Member depending on the number of Certificates of Origin issued in a coffee year. See Annex VII for a detailed file format specification.

#### RULE 3

#### **Marking of bags and other packaging for export**

Every export of coffee shall receive an **International Coffee Organization** identification mark that shall be unique to the parcel of coffee concerned. The identification mark shall be printed inside a box on all the bags or other packaging, or stamped on a metal strip affixed to the bags or other packaging, and shall be shown on the relevant Certificate of Origin. It shall be composed of the country code number of the Member (up to three digits to be allocated by the Organization<sup>4</sup>), the code number of the grower or exporter (up to four digits to be allocated by the Member to each grower or exporter) and the serial number of the parcel of coffee (up to five digits to be supplied by the grower or exporter for each parcel exported, beginning with the number "1" for the first parcel exported on or after 1 October each year and proceeding in sequence to 30 September the following year. An alternative sequential numbering system may be used, but Members must notify the ICO Secretariat of this alternative system.

#### RULE 4

#### **Exports of coffee**

1. Subject to the exceptions described in paragraph 8 of this Rule, every export of coffee from any Member to any destination must be covered by a valid Certificate of Origin completed and issued in accordance with these Rules.

2. All bags or other packaging shall bear an ICO identification mark in accordance with the provisions of Rule 3<sup>5</sup>.

3. The original and the first copy of each Certificate of Origin must bear the cachet of the Customs Service or Certifying Agency of the issuing Member. This shall be applied by the Customs Service or Certifying Agency when it is satisfied that export is about to take place.

<sup>4</sup> See Annex I.

<sup>5</sup> Each Certificate of Origin will allow for one ICO mark only.

---

4. The original of each Certificate of Origin shall be given to the exporter or his agent to accompany the shipping documents. The ICO identification mark shall, except as otherwise agreed between a Member and the Executive Director, be included on the transport document(s).

5. The first copy of each Certificate of Origin together with a copy of the relevant transport document(s) shall be forwarded by the safest and quickest possible means to the Organization, except when transmitted electronically, by the issuing Member as soon as possible and in any case within **60 days** of the date of shipment. Documents for which data are received electronically may be requested to be forwarded to the Organization for auditing purposes. It should be noted, however, that electronic transmissions should be carried out within **15 days** after the close of the month. The same period applies for those Members that transmit export data by alternative methods. If a parcel of coffee moves overland or by air to its destination, a copy of the relevant transport document(s) shall accompany the first copy of the Certificate of Origin when forwarded to the Organization.

6. When documents are requested to be forwarded to the Organization, a copy of each Certificate of Origin and a copy of the transport document(s) forwarded under the provisions of paragraph 5 of this Rule shall be sent in securely packed batches. Each batch shall clearly identify documents issued to cover exports made in the same month.

7. Notwithstanding the provisions of paragraphs 1 and 3 of this Rule, if the port of shipment is not in the country of origin of the coffee and the Member finds that it is impracticable to issue completed Certificates of Origin prior to export from origin, the Member may make arrangements for the necessary Certificates of Origin to be issued, either partially or wholly, by an agency located in the port of shipment and for completed copies of Certificates and the relevant transport document(s) to be forwarded to the Organization when requested for auditing, if these are transmitted electronically. All such arrangements shall be agreed between the Member and the Executive Director.

8. Certificates of Origin need not be issued to cover:

- (a) small quantities of coffee for direct consumption on ships, aircraft and other international commercial carriers; and
- (b) samples and parcels up to a maximum net weight of 60 kg of green coffee or the green bean equivalent thereof, if said samples or parcels are of another form of coffee.

9. Each exporting Member shall furnish to the Executive Director all information that may be requested in connection with exports of coffee covered by Certificates of Origin, including port records and Customs or Certifying agency records. The Executive Director may establish a procedure for the inspection of such information.

#### RULE 5

#### **Responsibilities of exporters in exporting Member countries**

The responsibility for ensuring the proper use of Certificates of Origin rests with exporting Members.

#### RULE 6

#### **Implementation**

The Executive Director shall take any action that may be considered necessary to ensure the effective implementation of the measures relating to Certificates of Origin provided for in the International Coffee Agreement 2007 and in these Rules.

#### RULE 7

#### **Amendments**

The Council shall keep these Rules under review and may make such amendments to them as it considers desirable.

**LIST OF EXPORTING MEMBERS IN ALPHABETICAL ORDER SHOWING THEIR RESPECTIVE ICO, EU AND ISO CODES; CROP YEAR; TYPE OF COFFEE PRODUCED AND METHOD OF PROCESSING MOSTLY USED**

**GENERAL GUIDANCE FOR COMPLETION OF  
ICO CERTIFICATES OF ORIGIN**

CERTIFICATES OF ORIGIN  
FOR EXPORTS TO ALL DESTINATIONS

(To be completed by the Certifying Agency and  
the Customs Service of the issuing exporting Member)

1. Enter the full name and address of the exporter/consignor in box 1 and its corresponding code number in the appropriate boxes on the bottom right-hand corner – (numeric field: four digits only).
2. Enter the notify address in box 2 (if available at the time the coffee is shipped to its final destination).
3. Enter the internal reference number, if any, in box 3 – (alpha-numeric field).
4.
  - (a) Enter the exporting Member country code (see Annex I to these Rules) in box 4 (a) – (numeric field: three digits).
  - (b) Enter the code number of the port or inland point of export in box 4 (b) – (numeric field: two digits – see document ICC-106-3).
  - (c) Enter the serial number of the Certificate in box 4 (c) (each Certifying Agency shall ensure that the numbering of the Certificates of Origin which it issues begins at “1” on 1 October each year and proceeds consecutively until 30 September the following year).
5. Enter the name of the country in which the coffee was produced and its corresponding country code number (see Annex I to these Rules) in box 5 – (numeric field: three digits only).
6. Enter the name of the country of the intended destination of the coffee and its corresponding country code number (see Annex III to these Rules for the list of destinations and their respective codes) in box 6 – (numeric field: three digits only).
7. Enter the date of export in either format DD/MM/YY or DD/MMM/YYYY, where DD = day; MM or MMM = month; and YY = last two digits of the year OR YYYY = year, in box 7 – (date field: DD/MM/YY or DD/MMM/YYYY).

8. Enter the name of the country where the coffee is due to be trans-shipped, in the case of an indirect shipment to its final destination, and its corresponding country code number in box 8 (see Annex III to these Rules for the list of destinations and their respective codes) – (numeric field: three digits only). If the coffee is proceeding direct to its final destination enter the word ‘DIRECT’ in the box.
9. Enter the name of the carrier (vessel) on board of which the coffee is to be shipped and the corresponding code number (each Certifying Agent shall allocate a unique code to each vessel) in box 9 – (numeric field: five digits only). If the coffee is not to be forwarded by ship, enter the appropriate information concerning the form of transport, for example, by lorry, by rail, by air.
10. The bags or packaging in each parcel of coffee covered by a single Certificate of Origin must bear a unique ICO identification mark, printed inside a box or stamped on a metal strip affixed to the bags or other packaging. Enter the ICO identification mark and any additional shipping marks or other identification in the space provided in box 10 – (numeric field: xxx/xxxx/xxxxx). For details on the ICO identification mark, please refer to Rule 3.
11. Mark “X” in the appropriate box(es).
12. Enter the net weight, rounded to the nearest whole unit of weight (1 pound = 0.4536 kg).
13. Specify the unit of weight by marking “X” in the appropriate box.
14. Specify the form and type of coffee by marking “X” in the appropriate box. If coffee other than green Arabica, green Robusta, roasted, soluble or liquid (as appropriate) is being exported, tick the ‘Other’ box. If an export of coffee includes more than one form and/or type of coffee, separate Certificates of Origin are required for each form and/or type of coffee included in the shipment.
15. Enter information relevant to the processing method (tick box(es) as appropriate). It should be noted that if Certificates of Origin are issued to cover organic coffee, the certification of such produce must comply with the specifications set out in ISO Guide 65 – *General Requirements for bodies operating products certification*. In cases of this nature, exporting Members undertake full responsibility that the option for ‘Certified’ on the Certificate of Origin refers to ‘certified organic coffee’ in accordance with the ISO Guide 65, otherwise tick the box for uncertified.
16. The Customs Service or Certifying Agency in the port or other location from which the coffee is exported shall validate the Certificate of Origin with its cachet as confirmation that export is about to take place. The authorized Customs officer or Certifying Agent shall sign and date the Certificate in the space provided.

17. Box 17 of the Certificate of Origin refers to voluntary information on the quality of the coffee being exported in accordance with the parameters set out in Resolution 420, if the export refers to green coffee; information on special characteristics of the coffee, if applicable; information related to the Harmonized System codes; and information on the FOB value of the shipment. See Annex IV for details.

### **IMPORTANT**

**A COPY OF EACH CERTIFICATE OF ORIGIN SHALL BE FORWARDED TO THE INTERNATIONAL COFFEE ORGANIZATION TOGETHER WITH A COPY OF THE RELEVANT TRANSPORT DOCUMENT(S) WITHIN 60 DAYS OF THE DATE OF EXPORT. HOWEVER, THIS OBLIGATION DOES NOT APPLY TO THOSE MEMBERS SENDING DATA ELECTRONICALLY, UNLESS SPECIFICALLY REQUESTED BY THE ORGANIZATION.**

### OTHER RELEVANT INFORMATION

Box 17 of the Certificate of Origin has been designed to collect additional information on a voluntary basis. It should be noted that the data entered in this field will be used in aggregated form only and details of individual shipment will not be disclosed. The areas of interest are:

- **Box 17a: Resolution 420:** on the basis of the decision adopted by the Council (see Annex V), Members are invited to provide information on the quality of the green coffee in accordance with specific target defects and moisture contents:
  - “S”: Full compliance with the target defect and moisture standards
  - “XD”: Coffee does not conform to the target defect standard
  - “XM”: Coffee does not conform to the target moisture standard
  - “XDM”: Coffee does not conform to either standard (target defect and moisture)
- **Box 17b: Special characteristics:** if the coffee covered by the Certificate of Origin has special characteristics (e.g., it is covered by a certification/verification programme or is classified as speciality/gourmet). Annex VI provides a detailed list of such special characteristics, which will be kept under review and regularly updated. Information on the special characteristics should be entered in the space provided by using the name(s) or corresponding identification code(s). More than one name or code may be indicated, if appropriate.
- **Box 17c: Harmonised System (HS) code:** in order to match the coffee being shipped with its HS code, it is requested that the appropriate commodity description code be entered in this box (please see the list below for the HS codes for each form of coffee).

Form of coffee	HS code	Description
<b>Green</b>	0901.11	Coffee, not roasted, not decaffeinated
	0901.12	Coffee, not roasted, decaffeinated
<b>Roasted</b>	0901.21	Coffee, roasted, not decaffeinated
	0901.22	Coffee, roasted, decaffeinated
<b>Soluble</b>	2101.11.00	Extracts, essences and concentrates of coffee
	2101.12.92	Preparations with a basis of extracts, essences and concentrates of coffee
	2101.12.98	Preparations with a basis of coffee

- **Box 17d: Information on the value of the shipment:** in order to match monthly reports that indicate volume and values by destination, Members are invited to enter the FOB value of the coffee being shipped in national currency, in US dollars (US\$) or in Euros (€).
- **Box 17e: Additional optional information:** an extra box is available for use by Members as necessary. The information provided would not be relevant to the Organization's database and would be used only for internal purposes at origin. This may also be used for messages from exporting Members relating to the coffee shipment.

## ICC Resolution No. 420

21 May 2004  
Original: English

E

**International Coffee Council**  
 Ninetieth Session  
 19 – 21 May 2004  
 London, England

### Resolution number 420

APPROVED AT THE THIRD PLENARY MEETING,  
21 MAY 2004

### Coffee Quality-Improvement Programme – Modifications

WHEREAS:

By Resolution number 406 the International Coffee Council established a Quality Committee to be responsible for drafting and presenting, through the Executive Board, recommendations to the Council for a Coffee Quality-Improvement Programme;

The Committee agreed a series of recommendations contained in document EB-3806/02 that led to the adoption by the Council of Resolution number 407;

The Programme comprised a first stage that commenced on 1 October 2002. An assessment of the Programme, its progress, costs and impact on quality and prices was presented to the Council in September 2003;

The Executive Board has reviewed the operation of the Programme and considered new comments and proposals submitted by Members; and

In the light of these proposals it is deemed appropriate to take steps to adjust the Programme,

THE INTERNATIONAL COFFEE COUNCIL

RESOLVES:

1. To replace the measures established under Resolution number 407 by those indicated in paragraphs 2 to 11 below.

**Action from 1 June 2004**

**A. Target quality standards for coffee**

2. The ICO adopts quality standards for exported coffee that must be met to be labelled as “S” coffee on the ICO Certificate of Origin:
  - (a) for Arabica, not to have more than 86 defects per 300 g sample (New York green coffee classification/Brazilian method, or equivalent<sup>1</sup>); and, for Robusta, not to have more than 150 defects per 300 g (Vietnam, Indonesia, or equivalent);
  - (b) for both Arabica and Robusta, not to have a moisture content below 8% or in excess of 12.5%, measured using the ISO 6673 method.
3. Where moisture percentages below 12.5% are currently being achieved, exporting Members shall endeavour to ensure that these are maintained or decreased.
4. Exceptions to the 12.5% maximum moisture content shall be permitted for speciality coffees that traditionally have a high moisture content, e.g. Indian Monsooned coffees. Such coffees shall be clearly identified by a specific grade nomenclature.

**B. Certificates of Origin**

5. Bearing in mind the voluntary nature of this Programme, in order to indicate the quality of coffee being exported, exporting Members are requested to complete Box 17 in the ICO Certificate of Origin used to accompany each shipment of coffee as follows: “S” if consignments of coffee comply with the target defect and moisture standards; “XD” if the

---

<sup>1</sup> As an example of what is meant by “equivalent”, 20 broken beans shall be considered as equal to 1 defect rather than 5 broken beans per defect in the case of coffees containing large numbers of broken beans arising naturally, as a feature of a particular cultivar. Such coffees shall be clearly identified by a specific grade nomenclature.

coffee does not conform to the target defect standard, “XM” if the coffee does not conform to the target moisture standard and “XDM” if the coffee does not conform with either standard. Speciality coffees as described in paragraph 4 of this Resolution may be marked “S” together with their specific grade nomenclature even if they do not meet the target moisture standard.

**C. Cooperation by importing Members**

6. Importing Members should endeavour to support the objectives of the Programme as appropriate.

**D. Measures to be taken in cases of non-compliance**

7. If through the normal course of trade it is found that coffee marked “S” fails to comply with the target standards, importing Members may notify the ICO of such shipments.

**E. Measures for controlling the application of the standards by Members**

8. Each exporting Member is requested to develop and implement national measures with the objectives of maximising the quality of coffee produced and ensuring that exports of green coffee shall be described as indicated in paragraph 5 above.

**F. Future research**

**Alternative uses for coffee**

9. Members are encouraged to identify sources of external finance from appropriate institutions for studies and measures that support the implementation of the Programme and, in particular, efforts to identify and put into practice cost-effective alternative uses for coffee which does not conform with the standards indicated in Section A.

**Grading and labelling systems**

10. In particular, Members are encouraged to study the potential advantages of existing private sector grading and labelling systems for improving the income of coffee producers.

**G. Reporting**

11. Members shall report to the Council on measures they have taken to implement this Resolution and inform the Council of any difficulties in this connection. If such be the case the Council, if so requested by a Member, may agree to give that Member time to resolve such difficulties.

**SPECIAL CHARACTERISTICS**

The list below names some of the special characteristics relevant to specific coffee shipments at the time these Rules are published. It will be kept under review and updated to include additional changes to programmes or special characteristics (including programmes/verification schemes), as appropriate.

<b>Code</b>	<b>Special characteristics</b>
(a)	Speciality/gourmet coffee
(b)	4C Association
(c)	Eurepgap
(d)	FLO International (Fairtrade)
(e)	<i>Q Coffee</i> System
(f)	Rainforest Alliance
(g)	Smithsonian Migratory Bird Center ('Bird friendly')
(h)	UTZ Certified
(i)	Corporate Standards (e.g. Nestlé AAA, Starbucks C.A.F.E. Practices, etc.)
(j)	Fair Trade USA
(k)	Other (please specify)
