Background

1. At its 105th Session in coffee year 2009/10, the Council reviewed proposals for revisions to the Rules on Statistics – Indicator prices which contains the procedures for the collection, transmission, calculation and publication of group and composite indicator prices effective from [date] (document WP-Council 203/10) in preparation for the entry into force of the ICA 2007.

2. This document contains the Rules on Statistics – Indicator prices under the International Coffee Agreement 2007 which were approved by the Council at its 105th Session in September 2010. It will supersede the previous procedures contained document EB-3776/01 Rev. 1 and they are due to come into force on 3 January 2011 if the International Coffee Agreement (ICA) 2007 comes into effect before 31 December 2010, else, on the first working day of the following month after the entry into force of the ICA 2007.
1. The procedures for the collection, transmission, calculation and publication of group and composite prices contained in this document were approved by the International Coffee Council at its 105th Session on 22 September 2010. They supersede the previous procedures contained in document EB-3776/01 Rev. 1 and they are due to come into force on 3 January 2011 if the ICA 2007 comes into effect before 31 December 2010, else, on the first working day of the following month after the entry into force of the ICA 2007.

2. These procedures provide for the calculation of indicator prices for the four groups of coffee and a composite price of the four groups calculated by applying the latest weighting based on patterns of trade. These are detailed in Annex I.

3. These procedures shall be applied for the duration of the International Coffee Agreement 2007 subject to periodic reviews of the pattern of trade. In addition, in light of the ten-year duration of the ICA 2007, it is recommended that this review takes place every three years.

INDICATOR PRICES

PROCEDURES FOR THE COLLECTION, TRANSMISSION, CALCULATION AND PUBLICATION OF GROUP AND COMPOSITE INDICATOR PRICES

1. This document contains the procedures to be followed by:

(a) the agents of the Executive Director in the USA, Germany and France for the collection and transmission to the International Coffee Organization of information relating to the prices of coffee on the markets of the USA, Germany and France; and

(b) the Organization for the calculation and publication of daily group and composite indicator prices.

2. The subject matter is dealt with in four sections divided as follows:

   Section 1: Procedures to be followed by the agent in the USA
   Section 2: Procedures to be followed by the agent in Germany
   Section 3: Procedures to be followed by the agent in France
   Section 4: Procedures for the calculation of daily group and composite indicator prices
SECTION 1

PROCEDURES TO BE FOLLOWED BY THE AGENT IN THE USA

Function of the agent of the Executive Director

1. The agent shall collect and transmit direct to the Organization information on the daily prices of green coffee on the physicals market in the USA for the following growths of coffee:

<table>
<thead>
<tr>
<th>Group</th>
<th>Growth of coffee</th>
</tr>
</thead>
<tbody>
<tr>
<td>Colombian Mild Arabicas</td>
<td>Colombian Excelso UGQ screen size 14</td>
</tr>
<tr>
<td>Other Mild Arabicas</td>
<td>Costa Rica Hard Bean</td>
</tr>
<tr>

<td>Guatemala Prime Washed</td>
</tr>
<tr>
<td></td>
<td>Honduras High Grown</td>
</tr>
<tr>
<td></td>
<td>Mexico Prime Washed</td>
</tr>
<tr>
<td>Brazilian &amp; Other Natural Arabicas</td>
<td>Brasil Santos 3/4 screen size 14/16</td>
</tr>
<tr>
<td>Robustas</td>
<td>Indonesia EK Grade 4</td>
</tr>
<tr>
<td></td>
<td>Uganda Standard</td>
</tr>
<tr>
<td></td>
<td>Vietnam Grade 2</td>
</tr>
</tbody>
</table>

Basis for collection of the information

2. Prices shall be expressed in US cents per pound of green coffee.

3. Prices shall relate to:

   (a) ex-dock quotations for prompt shipment in the USA physicals market. If ex-dock prices are not available, FOB or CIF prices may be used, adjusted to an ex-dock basis by applying the differentials prevailing at the time the quotations are obtained;

   (b) trading in the late afternoon (New York time); and

   (c) sales from origin. In the absence of a significant volume of sales from origin, prices related to second-hand sales shall be taken into account. In the absence of a significant volume of sales from origin, or second hand, offers from origin and second hand, in that order, shall be taken into account.
4. The agent shall endeavour to obtain information on the quantities traded at each of the prices collected for each growth specified in paragraph 1 and, on the basis of the information so obtained, shall apply the appropriate weighting in order to arrive at an ex-dock price which is representative for each growth on each market day. Prices quoted for insignificant quantities of coffee shall not be taken into account for the purpose of assessing the representative price for any of the growths specified in paragraph 1. It shall be left to the discretion of the agent to decide on the volume of coffee which may be considered to be insignificant.

5. In the case of growths in the group of Other Mild Arabicas, when there are transactions in both past and new crop coffees at any time, the average prices relating to each growth shall be recorded daily, where relevant.

Sources of daily information

6. Quotations shall be sought from at least five traders and brokers in the USA for each of the growths specified in paragraph 1.

Transmission of the information

7. The daily price for each growth obtained in the manner described in paragraphs 3 to 6 shall be transmitted by the agent daily by email or fax to reach the Organization by 10 a.m. (London time) on the working day following each market day.
SECTION 2

PROCEDURES TO BE FOLLOWED BY THE AGENT IN GERMANY

Function of the agent of the Executive Director

1. The agent shall collect and transmit direct to the Organization information on the daily prices of green coffee on the German physicals market for the following growths of coffee:

<table>
<thead>
<tr>
<th>Group</th>
<th>Growth of coffee</th>
</tr>
</thead>
<tbody>
<tr>
<td>Colombian Mild Arabicas</td>
<td>Colombian Excelso European preparation screen size 15</td>
</tr>
<tr>
<td>Other Mild Arabicas</td>
<td>El Salvador Strictly High Grown</td>
</tr>
<tr>
<td></td>
<td>Guatemala Hard Bean</td>
</tr>
<tr>
<td></td>
<td>Honduras High Grown European preparation</td>
</tr>
<tr>
<td>Brazilian &amp; Other Natural Arabicas</td>
<td>Brasil Santos 2/3 screen size 17/18</td>
</tr>
<tr>
<td>Robustas</td>
<td>Vietnam Grade 2</td>
</tr>
</tbody>
</table>

Basis for collection of the information

2. Prices shall be expressed in US dollars per 50 kilogrammes of green coffee.

3. Prices shall relate to:

   (a) ex-dock quotations for prompt shipment on the physicals markets in Germany. If ex-dock prices are not available, FOB, CIF or C. & F. prices may be used, adjusted to an ex-dock basis by applying the differentials prevailing at the time the quotations are obtained;

   (b) trading in the late afternoon (German time); and

   (c) sales from origin. In the absence of a significant volume of sales from origin, prices related to second-hand sales shall be taken into account. In the absence of a significant volume of sales from origin, or second hand, offers from origin and second hand, in that order, shall be taken into account.
4. The agent shall endeavour to obtain information on the quantities traded at each of the prices collected for each growth specified in paragraph 1 and, on the basis of the information so obtained, shall apply the appropriate weighting in order to arrive at an ex-dock price which is representative for each growth on each market day. Prices quoted for insignificant quantities of coffee shall not be taken into account for the purpose of assessing the representative price for any of the growths specified in paragraph 1. It shall be left to the discretion of the agent to decide on the volume of coffee which may be considered to be insignificant.

5. In the case of growths in the group of Other Mild Arabicas, when there are transactions in both past and new crop coffee at any time, the average prices relating to each growth shall be recorded daily, where relevant.

Sources of daily information

6. Quotations shall be sought from at least five traders and brokers in Germany for each of the growths specified in paragraph 1.

Transmission of the information

7. The daily price for each growth obtained in the manner described in paragraphs 3 to 6 shall be transmitted by the agent daily by email or fax to reach the Organization by 10 a.m. (London time) on the working day following each market day.
SECTION 3

PROCEDURES TO BE FOLLOWED BY THE AGENT IN FRANCE

Function of the agent of the Executive Director

1. The agent shall collect and transmit direct to the Organization information on the daily prices of green coffee on the French physicals market for the following growths of coffee:

<table>
<thead>
<tr>
<th>Group</th>
<th>Growth of coffee</th>
</tr>
</thead>
<tbody>
<tr>
<td>Colombian Mild Arabicas</td>
<td>Colombian Excelso European preparation screen size 15</td>
</tr>
<tr>
<td>Other Mild Arabicas</td>
<td>Honduras High Grown European preparation</td>
</tr>
<tr>
<td>Brazilian &amp; Other Natural Arabicas</td>
<td>Brasil Santos 3/4 screen size 14/16</td>
</tr>
<tr>
<td>Robustas</td>
<td>Côte d’Ivoire Grade 2</td>
</tr>
<tr>
<td></td>
<td>Indonesia EK Grade 4</td>
</tr>
<tr>
<td></td>
<td>Uganda Standard</td>
</tr>
<tr>
<td></td>
<td>Vietnam Grade 2</td>
</tr>
</tbody>
</table>

Basis for collection of the information

2. Prices shall be expressed in € (Euro) per metric tonne of green coffee.

3. Prices shall relate to:
   (a) ex-dock quotations for prompt shipment on the physicals markets in France. If ex-dock prices are not available FOB or CIF prices may be used, adjusted to an ex-dock basis by applying the differentials prevailing at the time the quotations are obtained;
   (b) trading in the late afternoon (French time); and
   (c) sales from origin. In the absence of a significant volume of sales from origin, prices related to second-hand sales shall be taken into account. In the absence of a significant volume of sales from origin, or second hand, offers from origin and second hand, in that order, shall be taken into account.
4. The agent shall endeavour to obtain information on the quantities traded at each of the prices collected for each growth specified in paragraph 1 and, on the basis of the information so obtained, shall apply the appropriate weighting in order to arrive at an ex-dock price which is representative for each growth on each market day. Prices quoted for insignificant quantities of coffee shall not be taken into account for the purpose of assessing the representative price for any of the growths specified in paragraph 1. It shall be left to the discretion of the agent to decide on the volume of coffee which may be considered to be insignificant.

5. In the case of growths in the group of Other Mild Arabicas, when there are transactions in both past and new crop coffee at any time, the average prices relating to each growth shall be recorded daily, where relevant.

Sources of daily information

6. Quotations shall be sought from at least four traders and/or brokers in France for each of the growths specified in paragraph 1.

Transmission of the information

7. The daily price for each growth obtained in the manner described in paragraphs 3 to 6 shall be transmitted by the agent daily by email or fax to reach the Organization by 10 a.m. (London time) on the working day following each market day.
SECTION 4

PROCEDURES FOR THE CALCULATION
OF DAILY GROUP AND COMPOSITE INDICATOR PRICES

1. For the purposes of these procedures, ‘market day’ shall be deemed to mean a day when at least two markets are open for business and operative.

Colombian Mild Arabicas

2. Each market day the Executive Director shall take the ex-dock prompt shipment prices of the following growths of coffee of the Colombian Mild Arabicas group in each of the markets indicated:

<table>
<thead>
<tr>
<th>Market</th>
<th>Growth of coffee</th>
</tr>
</thead>
<tbody>
<tr>
<td>USA</td>
<td>Colombian Excelso UGQ screen size 14</td>
</tr>
<tr>
<td>Germany</td>
<td>Colombian Excelso European preparation</td>
</tr>
<tr>
<td></td>
<td>screen size 15</td>
</tr>
<tr>
<td>France</td>
<td>Colombian Excelso European preparation</td>
</tr>
<tr>
<td></td>
<td>screen size 15</td>
</tr>
</tbody>
</table>

3. The arithmetical mean of the prices for the growths in Germany and France shall be calculated on a daily basis. This mean shall constitute the price of the group in the European market. If the price is not quoted in either one of these markets, the price for the growth on the market concerned shall be calculated by applying the percentage change in the price of the other market on the preceding market day.

4. If the price of the growth referred to in paragraph 2 for the USA is not quoted or if the price of the growth for the European market is not quoted, the daily indicator price for the group of Colombian Mild Arabicas shall be calculated as follows:

   (a) if the price in the US market is not available, the indicator price of the group shall be calculated by applying the percentage change in the price of the European market to the indicator price for the group on the preceding market day; and
   (b) if the price for the European market is not available, the indicator price of the group shall be calculated by applying the percentage change in the US market to the indicator price for the group on the preceding market day.
If after five consecutive market days there continues to be no price for the US market or no price for the European market, as the case may be, the Executive Director shall, in consultation with the Statistics Committee, consider appropriate actions to be taken.

5. Subject to the provisions of paragraph 4, the Executive Director shall calculate for each market day the indicator price for the group of Colombian Mild Arabicas by applying the weightings set out in Annex I.

Other Mild Arabicas

6. Each market day the Executive Director shall take the ex-dock prompt shipment prices of the following growths of coffee of the Other Mild Arabicas group in each of the markets indicated and calculate the arithmetical mean of these prices in each of the markets separately, where relevant:

<table>
<thead>
<tr>
<th>Market</th>
<th>Growth of coffee</th>
</tr>
</thead>
<tbody>
<tr>
<td>USA</td>
<td>Costa Rica Hard Bean</td>
</tr>
<tr>
<td></td>
<td>Guatemala Prime Washed</td>
</tr>
<tr>
<td></td>
<td>Honduras High Grown</td>
</tr>
<tr>
<td></td>
<td>Mexico Prime Washed</td>
</tr>
<tr>
<td>Germany</td>
<td>El Salvador Strictly High Grown</td>
</tr>
<tr>
<td></td>
<td>Guatemala Hard Bean</td>
</tr>
<tr>
<td></td>
<td>Honduras High Grown European preparation</td>
</tr>
<tr>
<td>France</td>
<td>Honduras High Grown European preparation</td>
</tr>
</tbody>
</table>

7. The arithmetical mean of a growth from the same origin in Germany and France shall be calculated on a daily basis. This mean will be the price for the growth under reference in the European market. If the price of the growths from the same origin referred to in paragraph 6 is not quoted in either one of the markets, the average price for the growth on the market concerned shall be calculated by applying the percentage change in the price of the other market on the preceding market day.

8. If the price of one or more of the growths referred to in paragraph 6 is not quoted in either one of the markets, the average price for Other Mild Arabicas on the market concerned shall be calculated by applying the percentage change in the prices of the remaining growths to the average price for Other Mild Arabicas on that market on the preceding market day. This procedure shall be followed for up to five consecutive market days. If after five
consecutive market days the prices of one or more growths on a market continue not to be quoted, the mean of the price of the remaining growths shall be taken thereafter as the price of Other Mild Arabicas on the market concerned.

9. If the prices of none of the growths mentioned in paragraph 6 are quoted in the US market or if the prices of none of the growths are quoted in the European market, the daily indicator price for the group of Other Mild Arabicas shall be calculated as follows:

   (a) if the average price of the US market is not available, the indicator price of the group shall be calculated by applying the percentage change in the average price of the European market to the indicator price for the group on the preceding market day; and

   (b) if the average price of the European market is not available, the indicator price of the group shall be calculated by applying the percentage change in the average price of the US market to the indicator price for the group on the preceding market day.

If after five consecutive market days there continues to be no average price for the US market or no average price for the European market, as the case may be, the Executive Director shall, in consultation with the Statistics Committee, consider the appropriate actions to be taken.

10. Subject to the provisions of paragraphs 7 to 9, the Executive Director shall calculate for each market day the indicator price for the group of Other Mild Arabicas by applying the weightings set out in Annex I.

**Brazilian & Other Natural Arabicas (Brazilian Naturals)**

11. Each market day the Executive Director shall take the ex-dock prompt shipment prices of the following growths of coffee of the Brazilian Naturals group in each of the markets indicated:

<table>
<thead>
<tr>
<th>Market</th>
<th>Growth of coffee</th>
</tr>
</thead>
<tbody>
<tr>
<td>USA</td>
<td>Brasil Santos 3/4 screen size 14/16</td>
</tr>
<tr>
<td>Germany</td>
<td>Brasil Santos 2/3 screen size 17/18</td>
</tr>
<tr>
<td>France</td>
<td>Brasil Santos 3/4 screen size 14/16</td>
</tr>
</tbody>
</table>

12. The arithmetical mean of the growths in Germany and France shall be calculated on a daily basis. This mean shall constitute the price of the group in the European market. If the price is not quoted in either one of the markets, the average price for the growth on the market concerned shall be calculated by applying the mean percentage change in the prices of the other market on the preceding market day.
13. If the price of the growths referred to in paragraph 11 for the USA is not quoted or if the price of the growth for the European market is not quoted, the daily indicator price for the group of Brazilian Naturals shall be calculated as follows:

   (a) if the price in the US market is not available, the indicator price of the group shall be calculated by applying the percentage change in the average price of the European market to the indicator price for the group on the preceding market day; and
   (b) if the average price for the European market is not available, the indicator price of the group shall be calculated by applying the percentage change in the US market to the indicator price for the group on the preceding market day.

If after five consecutive market days there continues to be no price for the US market or no average price for the European market, as the case may be, the Executive Director shall, in consultation with the Statistics Committee, consider the appropriate actions to be taken.

14. Subject to the provisions of paragraphs 12 and 13, the Executive Director shall calculate for each market day the indicator price for the group of Brazilian Naturals by applying the weightings set out in Annex I.

**Robustas**

15. Each market day the Executive Director shall take the ex-dock prompt shipment prices of the following growths of coffee of the Robusta group in each of the markets indicated and calculate the arithmetical mean of these prices in each of the markets separately, where relevant:

<table>
<thead>
<tr>
<th>Market</th>
<th>Growth of coffee</th>
</tr>
</thead>
<tbody>
<tr>
<td>USA</td>
<td>Indonesia EK Grade 4</td>
</tr>
<tr>
<td></td>
<td>Uganda Standard</td>
</tr>
<tr>
<td></td>
<td>Vietnam Grade 2</td>
</tr>
<tr>
<td>Germany</td>
<td>Vietnam Grade 2</td>
</tr>
<tr>
<td>France</td>
<td>Côte d’Ivoire Grade 2</td>
</tr>
<tr>
<td></td>
<td>Indonesia EK Grade 4</td>
</tr>
<tr>
<td></td>
<td>Uganda Standard</td>
</tr>
<tr>
<td></td>
<td>Vietnam Grade 2</td>
</tr>
</tbody>
</table>
16. The arithmetical mean of a growth from the same origin in Germany and France shall be calculated on a daily basis. This mean shall constitute the price for the growth under reference in the European market. If the price of the growths from the same origin referred to in paragraph 15 is not quoted in either one of the markets, the average price for the growth on the market concerned shall be calculated by applying the percentage change in the price of the other market on the preceding market day.

17. If the price of one or more of the growths referred to in paragraph 15 is not quoted in either one of the markets, the price for the Robustas group on the market concerned shall be calculated by applying the mean percentage change in the prices of the remaining growths to the price for Robustas on that market on the preceding market day. This procedure shall be followed for up to five consecutive market days. If after five consecutive market days the prices of one or more growths on a market continue not to be quoted, the mean of the price of the remaining growths shall be taken thereafter as the price of Robustas on the market concerned.

18. If the prices of none of the growths mentioned in paragraph 15 are quoted for the US market or if the prices of none of the growths are quoted for the European market, the daily indicator price for the group of Robustas shall be calculated as follows:

   (a) if the average price in the US market is not available, the indicator price of the group shall be calculated by applying the percentage change in the average price of the European market to the indicator price for the group on the preceding market day; and

   (b) if the average price of the European market is not available, the indicator price of the group shall be calculated by applying the percentage change in the average price of the US market to the indicator price for the group on the preceding market day.

If after five consecutive market days there continues to be no average price for the market in the USA or no average price for the European market, as the case may be, the Executive Director shall, in consultation with the Statistics Committee, consider the appropriate actions to be taken.

19. Subject to the provisions of paragraphs 16 to 18, the Executive Director shall calculate for each market day the indicator price for the group of Robustas by applying the weightings set out in Annex I.
**Composite indicator price**

20. For each market day the Executive Director shall calculate the composite indicator price in the manner described in paragraphs 1 to 19 by applying the weightings set out in Annex I.

21. As soon as all the data are received, verified and validated the composite and group indicator prices shall be posted on the Organization’s website.
SHARE OF THE MARKETS IN EACH GROUP OF COFFEE
AND THEIR WEIGHTING IN THE CALCULATION
OF THE ICO COMPOSITE INDICATOR PRICE

The procedures set out in these Rules take into account the following principles:

(a) the procedures followed by the agents in the two main markets (the European market – comprising France and Germany – and the market in the USA);

(b) the share of each group is based on the average export performance to the USA and to the European Union in the four preceding calendar years; and

(c) the weighting of each group is to be reviewed every two years.

The share of each market in the four groups is as follows:

- Colombian Milds: 46% USA – 54% EU
- Other Milds: 40% USA – 60% EU
- Brazilian Naturals: 24% USA – 76% EU
- Robustas: 16% USA – 84% EU

The calculation of the ICO composite indicator price is weighted as follows:

- Colombian Milds: 12%
- Other Milds: 23%
- Brazilian Naturals: 31%
- Robustas: 34%
