Statistics Committee
26 September 2007
London, England

**Exports of all forms of coffee to
exporting countries
October 2006 to June 2007**

Background

1. In accordance with the Rules on Statistics contained in document EB-3830/02, exporting Members are requested to provide information on total imports by month, by form of coffee and by origin. Since September 2006, a few exporting Members have responded to requests from the Organization to provide information on their imports of coffee by origin and by form.
2. Table 1 shows data, for the period October 2006 to June 2007, on the volume of exports and re-exports in the period under reference as declared by the exporting country and/or the importing country on their monthly reports. Table 2 is the equivalent table giving the percentage share of each exporting country in the total. It may be noted that data may be partial as the ICO certifying agents in exporting countries have to contact their customs authorities or central banks in order to obtain data on imports
3. Table 3 gives the volume of coffee imports from October 2006 to June 2007 as declared by the exporting countries reporting their imports of coffee. The data received shows that only 20% of the declared exports to exporting countries are being reported as imports.
4. It should be noted that three exporting countries, which have been reported in monthly reports as the final destination of the coffee exported thereto from all sources, namely Mexico, Indonesia and Philippines, have yet to provide the Organization with reports on their imports. These three exporting Members account for 43% of the declared exports from all countries.

Action

The Statistics Committee is requested to analyse the information presented in this document and to make the appropriate recommendations for action.
