**Exports of all forms of coffee to
exporting countries
Calendar year 2003 to 2007**

Background

1. When exporting Members import coffee, they are requested to provide information on total imports by month, by form of coffee and by origin. In recent months, a few exporting Members have responded to requests from the Organization to provide information on their imports of coffee by origin and by form. It has been explained that delays in responding might be due to the need to consult with the Customs Authorities and/or Central Banks in order to obtain the information.
2. Table 1 shows data on the volume of exports and re-exports of all forms of coffee to exporting countries as declared by exporting and importing countries for calendar years 2003 to 2007. Table 2 gives this information by form of coffee for calendar year 2007.
3. Table 3 shows declared exports of all forms of coffee to exporting countries by the main origins in calendar year 2003 to 2007. Table 4 gives this information by form of coffee in calendar year 2007.
4. Table 5 gives the volume of coffee imports in calendar years 2003 to 2007 as declared by the exporting countries reporting their imports of coffee. The volume of reported imports as declared by exporting countries as a percentage of the volume of the declared exports to exporting countries indicates the discrepancy of data between the two sources.
5. Four exporting countries, which appear as the final destination of the coffee exported thereto with a significant volume from all origins, namely Indonesia, Mexico, Philippines and Thailand, have yet to provide the Organization with reports on their imports. Together, they account for 40% of the declared exports from both importing and exporting countries.

Action

The Statistics Committee is requested to analyse the information presented in this document and to make the appropriate recommendations for action.
