WP Statistics No. 93/05

21 December 2005  
English only

E

Statistics Committee  
30 January 2006  
London, England

**Organic coffee export statistics  
Coffee year 2004/05**

## Background

1. As requested by the Statistics Committee, the Secretariat has continued to monitor exports of organic coffee based on information received from exporting Members in compliance with the Rules for the application of a system of Certificates of Origin, contained in document EB-3775/01, which came into effect on 1 October 2001.
2. Although most exporting Members have adjusted their statistical systems to comply with the Rules, data may be incomplete or partial for some exporting countries.
3. The attached table shows exports of coffee labelled as “organic<sup>1</sup>” by origin, by destination and by form in coffee year 2004/05. Based on the information received, total organic exports in 2004/05 amounted to 758,270 bags, of which 755,455 bags correspond to green coffee (equivalent to 99.63% of the total). Arabica green coffee corresponds to 99.26% of the total exported in 2004/05.
4. The volume of total exports shown in Annex I includes 400,000 bags exported by Peru, in accordance with information received from the Peruvian coffee authorities. This volume represents 52.96% of the total volume of all coffee exported in the period. The percentage share by quarter on the total volume of organic coffee exported in 2004/05 is also indicated and so is the percentage share by form of coffee on the total. Annex II shows the volume of exports by origin and to each destination (excluding those from Peru).

## Action

The Statistics Committee is requested to take note of this document.

---

<sup>1</sup> In accordance with the Rules contained in document EB-3775/01, exporting Members are to take full responsibility for ensuring that the certification of organic coffee complies with the specifications set out in ISO Guide 65 – General Requirements for bodies operating products certification.
