ICO ROUND TABLE ON EQUITABLE TRADING AND COFFEE

MAY 18, 2004
The Role of the Coffee Industry in Importing Countries in Poverty Reduction

P. Leheup,
Nestlé Coffee and Beverages Strategic Business Unit,
Commodity Sourcing Manager

OUTLINE OF PRESENTATION

1. Nestlé and Fair Trade
2. NESCAFE sales’ growth and consequent contribution to green coffee utilisation
3. Nespresso Activities, Nestlé’s specialty/gourmet coffee sector
4. NESCAFÉ factories in Developing Countries, and in particular in Green Coffee Producing Countries
5. Direct procurement and technical assistance to farmers
6. Nestlé involvement in Green Coffee Sustainable initiatives
7. The role of the coffee industry in importing countries in poverty reduction: Nestlé example

1.  NESTLÉ AND FAIR TRADE MOVEMENTS

• Fair Trade contributes to raise awareness among the general public of the coffee farmers situation.
• Nestlé has to consider Fair Trade approach from a mainstream viewpoint (not niche sector). Comparison between prices guaranteed to farmers by FT and production cost demonstrates encouragement to over production.

<table>

* South America
** Central America, Mexico, Africa, Asia
*** Five first producing countries: about 75% of world production

2. NESCAFE SALES’ GROWTH, AND CONSEQUENT CONTRIBUTION TO GREEN COFFEE UTILISATION

• It is often requested that Manufacturers increase their efforts in order to boost coffee consumption.
• From 1990 to 2002:
  1. Coffee beverages (R&G and Soluble) market growth worldwide, all sectors together: ~ + 18%
  2. R&G market growth: ~ + 9%
  3. Soluble growth: ~ + 40%
3. NESPRESSO ACTIVITIES

- DEPARTMENT OF SPECIALTY COFFEE IS OFTEN POINTED OUT AS ANOTHER SOLUTION TO COFFEE CRISIS (ONE OF THE 2 MAIN CONCLUSIONS OF TECHNOSERVE / McKINSEY STUDY)
  - NESPRESSO is Nestlé’s gourmet/specialty coffee business
  - Roast and Ground, contained in individual one cup servings
  - Best SHG/SHB Arabicas from Central America, Colombia and East Africa
  - Implementing traceability up to farms

4. NESCAFÉ factories in Developing Countries, in particular in Green Coffee Producing Countries

- 55% of NESCAFÉ is produced in Developing Countries, primarily the Green Coffee Producing Countries (former slide).
- The 11 NESCAFÉ factories in Green Coffee Producing Countries provide employment to thousands of people (farmers, other suppliers, contractors, employees, etc.). The added value is left where it is generated, i.e. in the Producing Country.
- Total volume of green coffee used by Nestlé in 2003: approx. 750'000 t (12% of world production).

5. Direct Procurement and Technical Assistance to Coffee Farmers
5. Optimising the supply chain by Direct Procurement and improving farms’ sustainability by Technical Assistance given to Coffee Farmers

1. Six NESCAFÉ factories in Green Coffee Producing Countries are supplied by a direct procurement: China, Philippines, Indonesia, Thailand, Ivory Coast & Mexico. Farmers can deliver directly to Nestlé buying stations, by-passing intermediaries, thus receiving a higher % of FOB price. Always paid according to quality (m.c. & defects). Good traceability. Volume: 110'000 t in 2002.

2. Of these 6 factories, 5 give technical assistance to farmers (with Nestlé Agronomists): China, Thailand, Mexico, Indonesia & Philippines. Advising Good Agricultural Practices, based on sustainable approach, including DIVERSIFICATION, quality factors, etc. (three Experimental and Demonstration farms).

6. Nestlé involvement in Green Coffee Sustainable initiatives

NESTLÉ IS INVOLVED IN THREE SUSTAINABLE COFFEE PLATFORMS WHICH COMPLEMENT EACH OTHER:

IN ADDITION TO DOCUMENTS: PILOT PROJECTS.
ALWAYS CONSIDERING THE MAINSTREAM SECTOR.

7. Summary of the contribution of the coffee industry in the importing countries in poverty reduction

NESTLÉ EXAMPLE, INCREASING DEMAND AND BEING PRESENT AT ORIGIN

A. INCREASING DEMAND OF COFFEE:

1. Mainstream sector:
   ✓ innovation, renovation, marketing activities, etc.
   ✓ Result: soluble coffee consumption has increased by 40% in volume during the last 12 years.

2. Specialty coffee: Nespresso

3. Coffee image: Improve the image of the world’s favourite beverage, involvement in “Positively Coffee”

B. BEING PRESENT AT SOURCE:

1. Contribute to implement/improve sustainability of farms:
   ✓ Participation into Sustainable platforms
   ✓ Implementing Pilot Projects

2. Contribute to optimise supply chain (shortening), providing farmers with higher green coffee price:
   ✓ Direct procurement schemes.

3. Produce finished-products in the green coffee producing countries themselves, creating added value & employment on the spot.
