INTERNATIONAL COFFEE AGREEMENT 2022

PREAMBLE

The Governments Party to this Agreement,

Recognizing the exceptional importance of coffee to the economies of many countries which are largely dependent on coffee for their export earnings and for the achievement of their social and economic development goals and of many countries where imports of coffee play a key role;

Recognizing the importance of the coffee sector to the livelihoods of millions of people, particularly in developing countries, and bearing in mind that in many of these countries production is on small-scale family farms;

Considering the need for collaboration among members of the value chain to work together to create the structural conditions that will not only allow coffee farmers to achieve real prosperity and improve their livelihoods continuously, but also secure the future for the next generations of coffee growers as well as for the global coffee industry;

Recognizing the contribution of a sustainable coffee sector to the achievement of internationally agreed development goals, including the relevant Sustainable Development Goals (SDGs);

Recognizing the need to foster the sustainable development of the coffee sector, leading to enhanced employment and income, and better living standards and working conditions in Member countries;

Considering that close international cooperation on coffee matters, including international trade, can foster an economically diversified global coffee sector, the economic and social development of producing countries, the development of coffee production and consumption, and improved relations between coffee exporting and importing countries;

Considering that collaboration between Members, international organizations, the Private Sector and all other stakeholders can contribute to the development of the coffee sector;

Recognizing that increasing access to coffee-related information and market-based risk management strategies, for which market transparency in the supply chain and mitigation of price volatility are essential, as well as facilitating the adoption of appropriate regulations, can help to avoid any market distortions that can be harmful to both producers and consumers; and

Noting the advantages derived from the international cooperation which resulted from the operation of the International Coffee Agreements 1962, 1968, 1976, 1983, 1994, 2001 and 2007,

Have agreed as follows:

- (13) Facilitating the availability of information, in particular, on financial tools and services that can assist coffee producers in Member countries to access credit and risk management instruments, allowing for greater financial inclusiveness and risk management, while also taking into account climate change;
- (14) Addressing, where appropriate through research, the challenges facing the global coffee sector including but not limited to price volatility, high production costs, pests and diseases, climate change and traceability of coffee; and
